*An Employee Owned Company*

"Apollo®"

**POWERPRESS**

## **SPS Companies, Inc. is excited to announce that we are now offering Apollo® POWERPRESS products.**

Every contractor wants to achieve maximum productivity with minimum wasted effort. Apollo® POWERPRESS can help any contractor obtain this goal by providing a system that is reliable, safe, easy, fast, and clean.

The Apollo® POWERPRESS system also offers a complete solution with a wide range of flexibility. The system can be utilized on standard steel pipe and can be used with different brands of press tools.

### **Unmatched Quality & Reliability**

Apollo® POWERPRESS products are manufactured using fully advanced automated modern machinery. This ensures a consistent, safe and high quality product. 100% of welded components undergo a leak test ensuring issue free installations in the field. In addition, all straight connectors with threaded ends are made from a single piece, thus eliminating potential leaks.

### **Apollo® POWERPRESS Advantages**

- Simple, fast connections
- Size ranges from 1/2" to 2"
- Compact fittings for recessed work
- Visual Press Indicator
- Clear identification of materials of construction
- Leak Before Press® feature (ensures visible leakage of non-pressed fittings)
- Suitable for heating, cooling, steam, sprinkler (coming soon) and gas installations
- Full line of integrated valves (eliminates need for adapters)

**Contact your SPS sales representative or an SPS location near you
